## **The Woodlands Township COVID-19 Update, Tuesday, April 7, 2020**

### ***Today's County News***

#### **Montgomery County COVID-19 Case Count**

Montgomery County Public Health District, in conjunction with Montgomery County Office of Emergency Management, is saddened to confirm a 4<sup>th</sup> death in Montgomery County related to COVID-19. He was a man in his 80s, who resided in The Woodlands, but died outside of the State of Texas. This is the first Montgomery County death of a resident who did NOT live in The Conservatory at Alden Bridge. We offer our condolences to his family and friends at this difficult time.

We can also confirm there are now 197 positive cases of COVID-19, up 36 cases from yesterday. We are happy to say 33 of our cases have fully recovered.

We have had a lot of questions surrounding CDC guidelines when it comes to family members of those who are having symptoms and/or those who have been tested. If someone in your household is having symptoms of COVID-19 including cough, fever and/or shortness of breath, your entire household should self-quarantine for 14 days. You should also monitor symptoms of everyone in the household, including twice-daily temperature checks – once in the morning and once in the evening. You can find more details here: <https://www.cdc.gov/coronavirus/2019-ncov/php/public-health-recommendations.html>.

If you and your entire household are well with no symptoms, you should still be staying home and only leaving your home if necessary.

Details on Montgomery County cases can be found here: <https://mcphd-tx.org/coronavirus-covid-19/confirmed-cases/>.

#### **Harris County COVID-19 Case Count**

As of Tuesday, April 7, 2020 (3:45 p.m.), Harris County Public Health (HCPH) has 162 new cases of COVID-19, which brings the total to 826 positive cases. HCPH is also confirming that 204 of its patients have recovered. There have been 12 total deaths of COVID-19 in Harris County and 11 in the city limits of Houston.

There have been 8 deaths in the NW Quadrant of Harris County. The Village of Creekside Park is located in the NW Quadrant of Harris County.

### **Grocery Store Special Hours**

Many grocery stores have special hours either for re-stocking or for seniors and others to have a quieter shopping experience. Please visit our community resource list to [view hours at different stores](#).

### **Staying Safe While Grocery Shopping**

Whether you are grocery shopping for your family in person or utilizing curbside pick-up/delivery options, there are still important safety practices that can help to limit your risk of exposure to COVID-19.

- Follow [federal guidelines](#) regarding social distancing and prevention. Maintain 6 feet of distance between yourself and other shoppers/grocery store employees. Pay particular attention when standing in line and continue to observe the 6-foot rule at all times.
- Disinfect high-touch surfaces such as grocery carts handles with a disinfectant wipe, if possible.
- If you use a debit or credit card, keep in mind that those machines are high-touch surfaces. Wash your hands after touching those surfaces and wipe down your cards with disinfectant wipes or an alcohol-based sanitizer. The [EPA has created a list of known disinfectants](#) that are effective against COVID-19 on surfaces.
- If possible, go to the store during off-peak hours when the store is less crowded. If you are a senior, try to shop during the Senior Hours that are offered at grocery stores in the community.

- Discard any disposable grocery bags upon unpacking your groceries and disinfect counters and surfaces where bags may have been placed for unpacking.
- Always wash your hands after handling food packaging and before eating.

Please keep in mind, [the FDA has stated that there is no evidence that COVID-19 is transmitted via food](#). It is a respiratory-borne virus and therefore the risk of contracting it through food or food packaging is extremely low. The main risk to an individual is thought to be from exposure to another person with COVID-19, who is symptomatic or asymptomatic, and touching one's face or mouth after coming into contact with an infected surface. [Social distancing and washing your hands frequently remains the most effective way to prevent the spread of COVID-19.](#)
